

LITHIUM BATTERY CRADLE

Overview:

Keep your battery safe and sound with the custom-fit Lithium Battery Cradle. The rubber encased stainless steel frame secures your battery storage even when the kayak is in rough waters or capsized. The Lithium Battery Cradle is optimized to fit within the hull of your kayak for dry and convenient storage.

Ships with:

Cradle with tension bolt

- 2 mounting screws
- 2 adhesive pads

Installation:

Determine the mounting position and install using the screws provided.

- Apply the adhesive protection pads over screw heads to prevent scratching the battery.
- Loosen the cradle's tension bolt and slide the battery into the cradle.
- Tighten the cradles tension bolt to secure the battery.
