

THROUGH-HULL WIRING KIT

The Wilderness Systems Through-Hull Wiring Kit provides you everything you need to easily route wires from a battery or other electronics from a hatch or pod through your kayak's hull. Water resistant fittings prevent flooding.

Ships with:

- 2 – base locking nuts
- 6 – variety of wire insert plugs

Installation:

NOTE: Do not install in external hull below the water line. The system is highly water resistant but not completely waterproof.

- Select the plug with the proper wiring size for your application.
- Select the mounting location and drill a 1 3/8" (35mm) hole.
- Install the male threaded base into the hole with the threads facing out.
- Run the wires through the male threaded base.
- Insert the wires into the plug. Utilize the side cut in the plug for easy wire insertion.
- Run the wires through the female threaded locking nut.
- Align the plug with the installed wires to fit into the locking nut.
- Tighten firmly.
