

TROLLING MOTOR MOUNT

Overview:

Wilderness Systems Trolling Motor Mount is a universal system designed to allow a small trolling motor to attach to the stern of a kayak in conjunction with a track mounting system.

Ships with:

- Trolling Motor Mount
- 4 diamond shaped bolts
- 4 mounting nuts
- Hex tool

Installation:

- Install your choice of two aftermarket mounting tracks to the stern area of the kayak. One set of instructions for proper rail placement is not possible to accommodate the large number of kayak shapes and designs. Make sure to align the tracks with the mounting slots on the Trolling Motor Mount before drilling any holes.
- Install the diamond shaped mounting bolts, 2 on each side, into track system. Make sure the diamond shaped bolts align with mounting slots.
- Place the Trolling Motor Mount onto the tracks with the diamond shaped bolts extending through the mounting slots.
- Install the mounting nuts onto the diamond shaped bolts and tighten firmly. Use the provided hex tool for tightening.
- Install the motor on the mounting plate.
- Note that the Trolling Motor Mount can be installed with the motor extending out on either side of the kayak.

Light Care & Maintenance:

- Rinse with fresh water after each use.
