Wilderness Systems has been at the forefront of the kayak fishing movement from the beginning. We were the first to offer an angler package and to have a kayak fishing team. We understand there is more to the experience than just the catch, there’s the thrill of the hunt. With the input from our team we have designed the best boats to get the biggest fish. Our boats aren’t your run of the mill fishing kayaks, they are fishing machines.

Leave the motor boat at the dock and explore new waters and new adventures aboard one of our sporting kayaks. Quiet, zero-polluting and stealthy, our fishing kayaks are rigged and ready to pursue the quarry of your choice.

Scotty console-mounted rod holder pivots and removes when not in use.

Two flush mount rod holders behind the seat in easy reach. (only one on sit-in kayaks)

Paddle- and rod-park bungees with quick-release tabs.

Molded-in milk crate notches stabilize your gear.

Molded-in bucket contour, secures bait bucket.
TARPON 120 ANGLER:
There's more buzz about this boat in kayak fishing circles than any other. It’s got it all: comfort, stability, stowage, glide, good looks.

Over the years we have tested a lot of plastics. Not one has come close to matching the desirable qualities of Gen2 high-density polyethylene. Gen2 perfectly balances durability versus weight and delivers a consistently smooth finish with rich, vibrant color. Our boats look, feel and perform better because we use Gen2 HDP.

**GEN2 ROTO-MOLDED COLORS**

- RED
- ORANGE
- YELLOW
- MANGO
- BLUE
- MYSTIC
- SPRUCE
- OLIVE
- SAND
- CAMO

**DURALITE POLYETHYLENE**

Duralite is the lightest possible roto-molded kayak, we offer. We use a high grade Metalocene polyethylene and precisely control its flow during the molding process to eliminate waste. Less material means 20% less weight. Duralite also produces a glossy finish, similar to the look of a composite boat.

**DURALITE ROTO-MOLDED COLORS**

- CLASSIC RED
- SUNBURST ORANGE
- BRIGHT YELLOW
- MIDNIGHT BLUE
- LIME

**PRO COMPOSITE**

Few things are as lovely to look at, or as joyful to paddle, as a Wilderness Systems composite kayak. Our layups in Kevlar or fiberglass are incredibly strong and light, and an exquisite expression of the kayak-builder’s art. When you’re ready to step up to the best, go pro.

**COMPOSITE COLORS**

**CORE COLOR COMBINATIONS** (DECK/HULL/TRIM)

- YELLOW/WHITE/DARK BLUE

PHASE 3 OUTFITTING: NOTHING ELSE COMPARES
The more you paddle the more you’ll appreciate the engineering marvels of Phase3 outfitting. The sculptured high-density foam seat encourages air circulation and the precise-position settings relieve thigh and back fatigue, delivering unprecedented fit and comfort. Our friction-adjustment system permits settings anywhere within the range of motion for that adjustment. You can set up your Phase3 seat precisely to fit YOUR body type. And you’ll never have to land and exit your boat to adjust your settings; all controls are right at your fingertips.

Comfort and safety are assured when you buy a Wilderness Systems kayak, even our value-priced models. Phase3 Lite is a scaled-back version of our full-featured outfitting. With a little less foam, fewer air flow channels and lacking the Backrest Height feature, it’s still superior outfitting to just about anything else out there.

COMFORT SEATING SYSTEM
Wilderness Systems is introducing the new CSS system (Comfort Seating System) on the new Ride 135 and Tarpon series. The CSS system provides superior sit-on-top comfort. With the exception of the Tarpon 130T, which will only have the seat back pad portion of the system, the other models will have a two pound density EVA foam seat pad and a contoured, padded, seat back. The seat pads match the contour of the respective kayaks rotomolded seat and provides additional grip and contact for better boat control.

FOOTBRACES: ADJUSTMENT AT YOUR FINGERTIPS

TRIGGERLOCK™: Most of our Sit-On-Top kayaks have TriggerLock footbraces, smooth-operating footpegs that quickly and easily adjust with the end of your foot or by reaching forward with your hands.

SLIDELOCK™: The ingenious SlideLock Footbrace System finally ends the frustrating struggle with footpeg adjustment. Our simple mechanism puts control right at your fingertips. You can set and reset your foot braces while sitting in your boat with a simple hand adjustment.
BOAT SPECS: HOW WE GET THEM, WHAT THEY MEAN

WEIGHT
Taken from a fully assembled boat.

CAPACITY
Field tests determine each model's capacity, with maximum being the greatest load the model can carry and still perform under typical conditions.

DIMENSIONS
Measured at points indicated by the accompanying diagrams. Touring boat depths are measured from the highest point on the cockpit rim to the bottom of the hull directly under that point.

Note: Polyethylene expands and contracts with changes in temperature and humidity. While we measure every boat we make, the specs cited in this catalog reflect a random sampling conducted prior to publication. You may find slight variations in the specs of your boat compared to the specs noted in this catalog.
