In 2015, the rudder blade is injection-molded thermoplastic carbon-filled nylon for more durability and stiffness, and has been re-engineered to a contemporary foil-shape for better efficiency and less drag in the water. A light-weight cord woven from Spectra® – a material known to be as durable as steel and less inclined to binding – now connects to the rudder components without special tools.

Performance and reliability are at the heart of our skeg systems. Durable construction and hydrofoil shape offer more efficient water mending for an overall improved paddling performance when deployed.

Featuring several material and design updates in 2015. The rudder blade is injection-molded thermoplastic carbon-filled nylon for more durability and stiffness, and has been re-engineered to a contemporary foil-shape for better efficiency and less drag in the water. A light-weight cord woven from Spectra® – a material known to be as durable as steel and less inclined to binding – now connects to the rudder components without special tools.
Whether it’s another cove to explore, the curiosity of what’s beyond the next bend, or just an amazing sunset – there’s always a reason to stay out on the water a little longer. An uncomfortable seat shouldn’t be a reason not to.

The Wilderness Systems patented Phase 3 AirPro seating system is designed with innovative features that add comfort and adjustability, simply to keep you paddling.

Ergonomic elements have been added to all aspects of the AirPro. The contoured seat and seat backs have been designed with increased comfort in mind. Multiple-sized holes in the special foam padding produce varying densities to provide extra cushioning along the spine and under the legs while comfortably supporting the sit bones. The flexible back rest features a cutaway for spinal support and a dynamic structural design that conforms to and moves with your back; the seat’s leg lifter area has a softer edge and is contoured under your thighs. The AirPro also features a carefully selected material over the perforated foam, greatly improving ventilation so you and your seat breathe and dry out quickly.

**FEATURES & BENEFITS**

- Groundbreaking seat back design flexes to support the paddler, providing back stability without limiting the paddler’s stroke.

- Large comfort holes allow ventilation for airflow while providing cushioning to hard contact areas under the legs and along the spine.

- Smaller holes on the backrest provide ventilation and increased support to the oblique muscles while the holes in the seat support the sit bones and provide drainage for water.

- A clean, refined look of luxury performance is achieved with crisp lines, technical materials and hidden pad attachment methods.

- Web straps located on both sides of the paddler allow the seat to be pulled forward for support while paddling or reclined for relaxation.

- Ergonomic, scalloped leg lifter design with a 3D contoured seat pad that cradles the paddler’s legs removing pressure and increasing blood flow.

- The central controls allow for adjustment of the leg lifter and seat back height.

- The mesh bag is the perfect place for a water bottle, camera, gear or excess adjustment straps.

Visit WildernessSystems.com for more information on the Wilderness Systems accessory product line.
ACCESSORIES

POWER, WIRING & LIGHTING

THE SOLAR PANELS

The Solar Panels ensure that your kayak electronics stay powered-up all day, even while underway. Small in size, but large in power the rigid solar panels are waterproof and feature a built-in charging meter and a modern USB connection.

THE LITHIUM BATTERY

Lightweight and water resistant, the Lithium Battery not only excels in form but in function as well with multiple output options, superior efficiency, power and amp hours. The compact design conveniently stows in most kayak hatches.

THE LITHIUM BATTERY CRADLE

Keep your battery safe and sound with the custom-fit Lithium Battery Cradle. The rubber-encased stainless steel frame secures your battery storage even when the kayak is in rough waters or capsized.

THE THROUGH-HULL WIRING KIT

Provides you everything you need to easily route wires from a battery or other electronics from a hatch or pod through your kayak’s hull. Water resistant fittings prevent flooding.

THE FLEX-ARM LED LIGHT

Featuring a 2-foot flexible, yet stable plastic arm, the LED light can be precisely aimed anywhere – vertically for visibility, towards the deck as work station lighting, or bent into the water as a fish attractant.

THE THRIVE BAITWELL

Engineered to integrate with most sit-on-top kayaks, the Thrive Baitwell features a unique flexible hose system to draw water from any scupper in the rear tankwell, while a pump simplifies the input/output cycle.

THE KAYAK KRATE

The Kayak Krate sophisticates the tankwell storage experience with a superior functional interface and sleek look never before seen in a fishing gear storage crate.

THE CUSTOM DRY BAG

Featuring a waterproof zipper for excellent access from the top, an interior pocket for storing small items you want to get to quickly, carry handles, and a shoulder strap for ease of transport.

THE CATCH COOLER

A perfect fit in most Wilderness Systems sit-on-top kayaks, the highly-insulated Catch Cooler can keep your catch fresh and your drink cold all-day and simultaneously with isolated compartments with two separate access points.

THE MESH STORAGE - 4 POCKET

With multiple shapes and sizes to choose from, each with unique compartments, taking control of your organization has never been easier.

THE MESH STORAGE - 3 POCKET

With multiple shapes and sizes to choose from, each with unique compartments, taking control of your organization has never been easier.

THE MESH STORAGE - TACKLE BOX

Store small items in easy to reach places on your kayak with the versatile Mesh Storage Sleeves. With multiple shapes and sizes to choose from, each with unique compartments, taking control of your organization has never been easier.
A convenient and versatile gear storage option for Wilderness Systems kayaks with oval Orbix hatches.

A convenient and versatile 4" gear storage option for Wilderness Systems kayaks with rectangular hatches.

Store small items in easy to reach places on your kayak with the versatile Mesh Storage Sleeves. With multiple shapes and sizes to choose from, each with unique compartments, taking control of your organization has never been easier.

A convenient and versatile gear storage option for Wilderness Systems kayaks with oval Orbix hatches.

Customize your kayak with removable accessories with the industry-leading SlideTrax™ rails, featuring a strong marine grade anodized aluminum.

Attach gear and gadgets within reach with this convenient mounting system designed exclusively for Wilderness Systems kayaks with SlideTrax™.

Quickly and easily install a motor on the stern of your Commander with this essential kit. Includes the mount, hardware and instructions needed to convert your kayak into a powered vessel. Not recommended for use with motors exceeding 54 lbs. thrust.

Get more storage flexibility in the tankwell of your compatible Wilderness Systems kayak with this adjustable security strap kit.

The Trolling Motor Mount is a universal mounting system that is designed to accommodate a variety of after-market trolling motors. Its compact size and tool-less adjustment points make it easy to install on the stern of your Wilderness Systems kayak.

Safely and easily secure your fishing rod or paddle with integrated hook-and-loop attachment, then simply fasten the Rod Leash’s swivel snap hook to any anchor point.

The Stabilizer Bar provides assistance with standing up in your kayak as well as lean-on stability while casting or fishing from a standing position. The strong double-walled maringrade aluminum bar is attached to the boat with connections on the SlideTrax rails and deck surface.

The Commander Motor Mount is a universal mounting system that is designed to accommodate a variety of after-market trolling motors. Its compact size and tool-less adjustment points make it easy to install on the stern of your Wilderness Systems kayak.

Customize your kayak with removable accessories with the industry-leading SlideTrax™ rails, featuring a strong marine grade anodized aluminum.

Attach gear and gadgets within reach with this convenient mounting system designed exclusively for Wilderness Systems kayaks with SlideTrax™.
The AirPro MAX high/low seating system is poised to give kayak anglers the competitive advantage they need to sight fish from the seat of their Ride.

Patent 9,242,703

The Anchor Trolley Kit for the Wilderness Systems Commander allows you to deploy an anchor from the cockpit and position the anchor line anywhere alongside the boat. Includes all hardware components and complete instructions for easy installation.

Retrofit your 2013 and earlier Wilderness Systems recreational and open-cockpit tandem kayaks with this essential rudder kit supplement.

Harmony is our trusted provider of quality paddling accessories, helping you get the most out of your kayak and your day on the water.

A premium kayak should be propelled by a premium paddle. Adventure Technology paddles offer the highest level of performance and quality — a perfect complement to your Wilderness Systems kayak.

Visit WildernessSystems.com for more information on the Wilderness Systems accessory product line.

### BOAT SPECS

#### WEIGHT
Average based on a fully assembled boat including all outfitting. (NOTE: Other companies may not include outfitting in their weight specifications.) Due to variances in production actual weights may vary +/- 2 lbs.

#### CAPACITY
Field tests determine each model’s capacity, with maximum being the greatest load the model can carry and still perform under typical conditions.

#### DIMENSIONS
Measured at points indicated by the accompanying diagrams. Touring boat depths are measured from the floor of the boat to the top of the cockpit.

#### ASPIRE

*For Rudder versions of these models, add 4 lbs.

All Wilderness Systems kayaks are designed and manufactured in the U.S.A., excluding composite-construction Pro models. Colors may vary slightly from those shown in catalog. Color combinations (Desert Camo, Dusk, Galaxy, Indigo, Mango, Midnight, and Sonar) will vary from those shown in catalog and are unique for each boat we produce.

Variations in color are not covered by warranty.

Polyethylene expands and contracts with changes in temperature and humidity. Actual dimensions can vary from those shown in the Specifications Chart due to molding process and/or exposure to extreme hot or cold temperatures. Slight variations are not covered by warranty.

Specifications and features are subject to change.

All Wilderness Systems kayaks are covered by a Limited Lifetime Warranty. Some limitations apply. Visit WildernessSystems.com for full details.
