

Kayak Krate Rod Holder Configurations

The Wildy Kayak Krate is designed to hold a total of:

- (6) tube rod holders *without* extensions
- OR
- (4) tube rod holders *with* extensions

Rod Holder Configurations (*without Extenders*)

Configuration #1
(*Double-Verticle*)

Configuration #2
(*Double-Angled*)

Configuration #3
(*Triple-Verticle*)

Configuration #4
(*Triple-Angled*)

Rod Holder Configurations (*with Extenders*)

Configuration #1
(*Double-Verticle*)

Configuration #2
(*Double-Angled*)

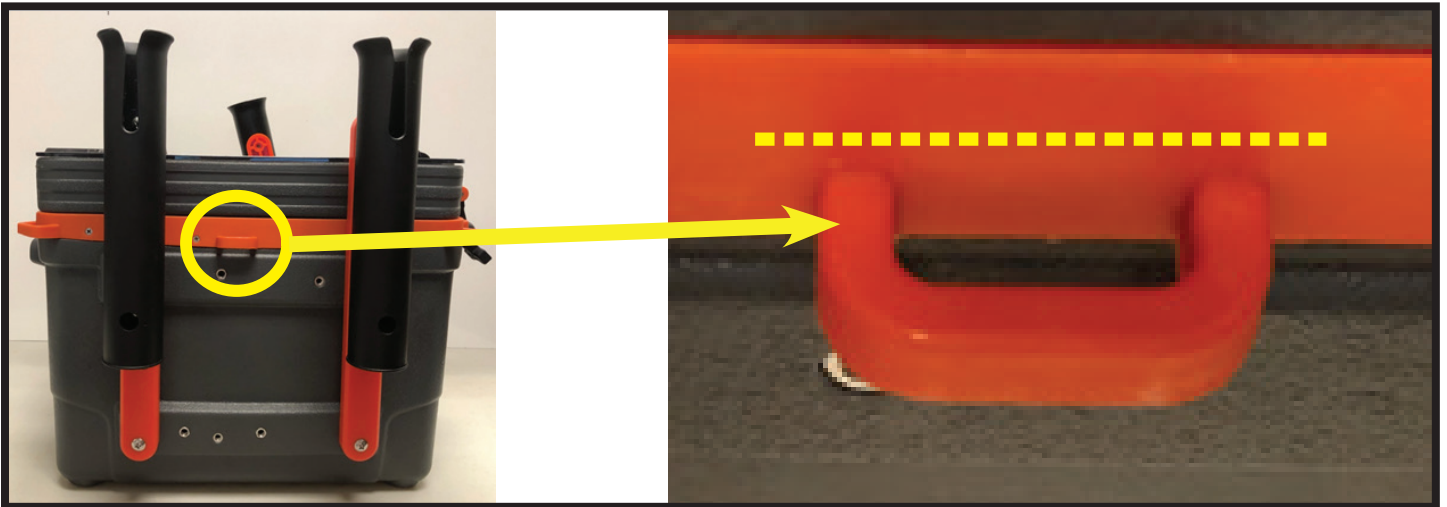

Increasing the Krate's capacity to accommodate (6) *Rod Holders with Extenders*

The Kayak Krate is designed to hold a total of (4) rod holders with extenders (*two on each side*), however, it can be altered to accept a total of (6) if needed.

To increase capacity, the middle lash-down points on each side of the Krate will need to be removed. This will require the use of a cutting tool such as a Dremel tool with cutting bit or a small hand-saw.

IMPORTANT:

Removing lash-down points voids the Krate's warranty. Any damage that occurs during this process will **NOT** be covered.

Configuration #3
(Triple-Verticle)

Configuration #4
(Triple-Angled)
